CONTEMPORARY PHYSICS

a review of physics and its applications

Editor
Professor J. S. Dugdale — Leeds

Reviews
Dr P. L. Knight — London

Editorial Board
Professor E. J. Burge — London
Dr P. F. Chester — Leatherhead
Professor B. R. Coles — London
Professor Sir Charles Frank, OBE, FRS — Bristol
Sir John Mason, CB, FRS — London
Dr M. V. Nevitt — Argonne
Professor Sir Rudolf Peierls, CBE, FRS — Oxford
Professor M. J. Rees, FRS — Cambridge
Professor G. W. Series, FRS — Oxford
Sir Arthur Vick, OBE — Warwick

Consultant Editors
Professor P. G. de Gennes — Paris
Professor R. Kaischew — Sofia
Professor Sir Nevill Mott, FRS — Cambridge

VOLUME 26

JANUARY to DECEMBER 1985

Contents of Vol. 26, (1–6)

Taylor & Francis
London and Philadelphia

Volume 26 Number 1 Jan/Feb 1985

3 Ion pumping in biological membranes
D. A. Eisner and S. C. Wray

23 Lattices for laymen: a non-specialist's introduction to lattice gauge theory Part I
D. J. E. Callaway

49 Critical phenomena: a brief historical survey
C. Domb

Essay reviews

73 From QED to sci-fi via solid crud
J. Paton

76 Desorption induced by electronic transitions
D. P. Woodruff

79 Book reviews

92 Books received

Volume 26 Number 2 Mar/Apr 1985

95 Lattices for laymen: a non-specialist's introduction to lattice gauge theory Part II
D. J. E. Callaway

125 Development and properties of neural networks
C. L. Scofield and L. N. Cooper

147 Co-operative and concentrative phenomena of swimming micro-organisms
J. O. Kessler

Essay reviews:

167 Quantum theory of gravity
J. M. Charap

169 Christopher Wren
C. Webster

171 Book reviews

199 Books received

Volume 26 Number 3 May/June 1985

203 Electrons in non-crystalline materials: the last twenty five years
N. F. Mott

217 Experimental techniques in particle physics
P. I. P. Kalmus

241 Trapped ions
G. Werth

257 Localization and quantization in silicon inversion layers
M. Pepper

Essay reviews

295 The physics of vibration
W. Gough

297 Maxwell's equations
W. H. McCrea

299 Book reviews

307 Books received

Volume 26 Number 4 July/Aug 1985

311 Ring interferometric tests of classical and quantum gravity
G. E. Stedman

333 Nothing's plenty. The vacuum in modern quantum field theory
I. J. R. Aitchison

Essay reviews

393 Chandrasekhar on Eddington and on black holes
W. H. McCrea

397 Galileo, free fall, and the law of inertia
J. Barbour

407 Book reviews

415 Books received

Volume 26 Number 5 Sep/Oct 1985

421 Conducting polymers
W. Hayes

443 The diode laser in atomic physics
J. C. Camparo

479 Information storage using alkali halide crystals
S. V. Pappu

Essay reviews

499 The optical papers of Isaac Newton
C. Taylor

503 Under Newton's shadow
W. H. McCrea

505 Book reviews

517 Books received

Volume 26 Number 6 Nov/Dec 1985

521 Nuclear physics for materials technology
Accelerator based methods
T. W. Conlon

559 Surface investigations with atomic beams
K. H. Rieder

579 Curved space and amorphous structures
Part I Geometric models
G. Venkataraman and D. Sahoo

Essay review

617 Key problems in physics and astrophysics
J. M. Irvine

621 Book reviews

631 Books received

AUTHOR INDEX (Vol. XXVI)

AITCHISON, I. J. R., Nothing's plenty: the vacuum in modern quantum field theory 333
BARBOUR, J., Essay review, Galileo, free fall and the law of inertia 397
CALLAWAY, D. J. E., Lattices for laymen: a non-specialist's guide to lattice gauge theory
Part I 23
Part II 95
CAMPARO, J. C., The diode laser in atomic physics 443
CHARAP, J. M., Essay review, Quantum theory of gravity 167
COOPER, L. N., *see* SCHOFIELD, C. L.
CONLON, T. W., Nuclear physics for materials technology: accelerator based methods 521
DOMB, C., Critical phenomena: a brief historical survey 49
EISNER, D. A., and WRAY, S. C., Ion pumping in biological membranes 3
GOUGH, W., Essay review, The physics of vibration 295
HAYES, W., Conducting polymers 421
IRVINE, J. M., Essay review, Key problems in physics and astrophysics 617
KALMUS, P. I. P., Experimental techniques in particle physics 217
KESSLER, J. O., Co-operative and concentrative phenomena of swimming micro-organisms 147
MCCREA, W. H., Essay review, Maxwell's equations 297
Essay review, Chandrasekhar on Eddington and on black holes 393
Essay review, Under Newton's shadow 503
MOTT, N. F., Electrons in non-crystalline materials: the last twenty-five years 203
PAPPU, S. V., Information storage using alkali halide crystals 479
PATON, J., Essay review, From QED to sci-fi via solid crud 73
PEPPER, M., Localization and quantization in silicon inversion layers 257
RIEDER, K. H., Surface investigations with atomic beams 559
SAHOO, D., *see* VENKATARAMAN, G.
SCHOFIELD, C. L., and COOPER, L. N., Development and properties of neural networks 125
STEDMAN, G. E., Ring interferometric tests of classical and quantum gravity 311
TAYLOR, C., Essay review, The optical papers of Isaac Newton 499
VENKATARAMAN, G., and SAHOO, D., Curved space and amorphous structures. Part I: Geometric Part I: Geometric models 579
WEBSTER, C., Essay review, Christopher Wren 169
WERTH, G., Trapped ions 241
WOODRUFF, D. P., Essay review, Desorption induced by electronic transitions 76
WRAY, S. C., *see* EISNER, D. A.
